TOTAL SIMPANAN ANGGOTA

```
DELIMITER $$
```

```
CREATE PROCEDURE sp_get_total_simpanan(  
    IN p_id_anggota INT  
)  
BEGIN  
    SELECT SUM(jumlah) AS total_simpanan  
    FROM simpanan  
    WHERE id_anggota = p_id_anggota;  
END $$
```

The screenshot shows a MySQL query results interface. At the top, a green bar indicates "Showing rows 0 - 0 (1 total, Query took 0.0180 second)". Below it, a query is shown: "CALL sp_get_total_simpanan(5);". Underneath the query, there are three buttons: "[Edit inline]", "[Edit]", and "[Create PHP code]". Further down, there are two sets of filtering options: "Show all" (unchecked), "Number of rows: 25", and a "Filter" button. A "total_simpanan" column header is present, with a single value "300000.00" listed below it. Another set of "Show all", "Number of rows: 25", and "Filter" controls is located at the bottom.
